THE BARNWRIGHT 3D DESIGNER

Let your customers build their shed in 3D.

Your buildings, sizes, colors and prices, on your own 3D designer web address. Customers design the building they want, see the price, and send you a quote.

What your customers do

- Pick a style and a size, and spin the building around in 3D.
- Choose colors, doors, windows and options, and drag them where they want them.
- See the price as they go, and a monthly price if you offer rent to own.
- Send you a quote with their building, from your website or your lot.

What you get

- **Your 3D designer** with your logo, colors and prices, on your own 3D designer web address, like yourbusiness.barnwrightsoftware.com. Plus a website code to show it on your own website.
- **Your Dealer Center**: one price list for every lot, and every customer, quote, follow-up and order.
- Your team: an owner, managers and dealers, each seeing their own lots.
- Works alongside the software you already use. We set it all up for you.

$0	$250	Included	$250
setup	a month, from the day it's ready	your first lot	one time, each lot after the first
