Welcome to your Barnwright 3D designer

Everything you need to get started, on one page

1 Your Dealer Center

Open **https://(your 3D designer web address)/dealer** and sign in with your email and password. Your 3D designer web address: _____.barnwrightsoftware.com
Tick **Keep me signed in on this device for 30 days** only on your own computer and phone. Lost your password? Tap **Forgot your password?** To sign out everywhere, tap your name, then **Sign out on every device**.

2 Keep it on your computer and phone

In Chrome or Edge, click **Install** at the right end of the address bar. On your phone: **Share**, **Add to Home Screen**, then sign in there too, with the same tick.

3 Your prices

Price list: your styles, sizes, doors, windows and options. Change a price and every lot has it at once. Build a style differently? Change **How it's built** and tap **Check every size**.

4 Your lots and quotes

Lots, **Add a lot**. Each lot has its own 3D designer link and its own customer list. Every quote a customer sends shows up in **Customers** as New, on the lot it came from.

5 Your team

Team, **Add a person**: your managers and dealers. Each one makes their own login with the email you add.

6 Your website

Lots, pick a lot, **Put the designer on your website**, **Copy website code**, and send it to whoever runs your website.

7 Barnwright

Settings, **Barnwright**: when Alan needs to check something, say what in **What should Barnwright do?**, pick **For how long**, tap **Turn on**. For now Barnwright can only run checks. It never sees your customers, quotes, orders or team.

8 Help and your card

Tap **Help** in your Dealer Center, or email **support@barnwrightsoftware.com**. Your monthly fee is charged to the card you saved when you signed up. For a different card, ask Alan for a new card link.
